## Statement of Significance

Last updated on - June 16, 2008

Horticultural value  
Contribution to the landscape of historic garden  
Rare or localised

These four *Pinus coulteri* are part of the major planting in the Park that dates from 1875. The outstanding characteristic of this species is the large, spiny cones which are 20-40cm long, and can weigh 2-5kg when fresh. Big Cone Pine is a native of the coastal mountains of southern California and northern Baja California (Mexico).

Measurements: 06/1984  
Spread (m): 20
