Statement of Significance

Last updated on - June 16, 2008

Contribution to landscape of historic garden
Outstanding example of species

These two trees are outstanding examples of *E. leucoxylon* which occur naturally in central-western Victoria, south-eastern South Australia (where known as Blue Gum) and near Barham NSW. They have reached a considerable size and have developed a large spreading canopy. The smooth bark is particularly attractive with attractive flowers appearing in winter. The species is not considered to be at risk in the wild

Measurements: 01/03/1988 northern tree
Spread (m): 22
Girth (m): 2.6
Height (m): 20.3
Estimated Age (yrs): 70
Condition: Good

Access: Unrestricted
Classified: 12/05/1988

Other Names Yellow Gum,
Hermes Number 70862
Property Number
