Statement of Significance

Last updated on - June 16, 2008

Contribution to landscape of historic garden
Outstanding size
Outstanding example of species

This is a particularly large specimen in cultivation. *Callistemon brachyandrus* is native to NSW, SA, and Victoria, occurring chiefly in Red Gum / Black Box woodland along the Darling and Lower Murray Rivers. It normally only attains a height of 2 to 3 metres. During the summer months, after most other *Callistemon* species have flowered, this tree has small red brushes up to 8 cm long over the branches.

2012: Tree removed

Measurements: 03/1984
Spread (m): 9.5
Girth (m): 1.44
Height (m): 7
Estimated Age (yrs): 80
Condition: Fair

Access: Unrestricted
Classified: 10/04/1984
