Contribution to landscape of historic cemetery Rare or localised

This tree is one of nine known examples in Victoria (1993) and

this is the only record of the species in a cemetery in Victoria. This

tree has a particularly attractive form with a dense domed crown. The

Himalayan Oak is native to the Himalayas and grows to around 25

metres. The former species name *leucotrichophora* means carrying

white hairs. It is located on the western side of the central path,

half way up the hill.

Species formerly known as *Quercus leucotrichophora*.
