Location

'Billilla', Halifax Street,, BRIGHTON VIC 3186 - Property No T11411

Municipality

BAYSIDE CITY

Level of significance

Regional

Heritage Listing

National Trust

Statement of Significance

Last updated on - June 10, 2004

Curious growth form

This specimen tree has an unusual growth due to a severe lightning strike which occurred on 2 February 1918. As the name suggests, this is a native to the Canary Islands making it highly suited to south-east Australia. It has a distinguishable and strongly fissured red bark, which provides a distinct visual contrast to its dark deep-green and soft textured foliage.

The historic home, "Billilla", was built between 1876-1878 and is classified by the National Trust. January 2010; The leaves (needles) are prolific and the canopy is almost shaped like a ball

Measurements: 01/1983

Spread (m):17

Girth (m): 3
Height (m):16
Estimated Age (yrs): 100+
Condition: Good
