Heritage Listing

National Trust

Statement of Significance

Last updated on - June 16, 2008

Remnant of native vegetation

This is a stand of remnant vegetation of approximately 300 trees covering 50 acres.

The trees on the eastern side of the road have been fenced and a conservation sign has been erected.

Grey Box (*E. microcarpa*) was noted as an endangered ecological community in March 2010 on the advice of the Threatened Species Scientific Committee. This is due to its decline in geographic distribution; and severe decline in integrity.

Measurements: 03/1983 for average tree

Spread (m): 21

Girth (m): 2

Height (m): 17
Estimated Age (yrs): 200+
Condition: Good-Fair

Measurements: 11/04/2011 for average tree
