Statement of Significance

Last updated on - July 19, 2004

Horticultural value
Rare or localised

This tree is an example of a species rare in cultivation in Victoria, with the only other known specimen at Portland Botanic Gardens. It is a very popular native in South Africa and is wind and drought tolerant. It has an evergreen, graceful habit & neat crown with smooth pale bark which becomes flakey with age. Located on the eastern edge of the park next to play equipment.
