National Trust

Statement of Significance

Last updated on - July 19, 2004

Contribution to the landscape.

Located on the north-east corner of the Ashburton Community Centre, this tree is a landmark feature of the area due to its size and location. Removal of a lower branch on the east side to clear powerlines is required.

Angophora costata is a common woodland and forest tree of Eastern Australia. It is a large, wide-spreading tree and can grow to a height of 20 metres. The old grey bark is shed in spring to reveal new pink bark. The timber is brittle and limbs tend to fall readily.

Measurements: 03/03/1994

Spread (m): 13.7

Girth (m): 2.57

Height (m): 21

Estimated Age (yrs): 50

Condition: Good
