National Trust

Statement of Significance

Last updated on - November 4, 2004

Rare or localised
Outstanding example of species

This tree is a spectacular example of a species uncommon in cultivation in Victoria. It is native across the Mediterranean region and the only other known examples are 5 trees in the Castlemaine Botanic Gardens. A feature of the tree is its conical shape and dense blue-green foliage. Its wood is used to produce Cade oil , a dark, aromatic oil with a strong smoky smell used in some traditional cosmetics and incense.

Measurements: 26/07/1992
Spread (m): 14.2
Girth (m): 2.94
Height (m): 15.75
Estimated Age (yrs): 100
Condition: Good

Access: Restricted
Classified: 12/08/1992

Other Names Prickly Juniper,
Hermes Number 70971
Property Number
