## Statement of Significance

Last updated on - June 16, 2008

Rare or Localised: disjunct community

Located in a suburban woodland setting these trees represent the southern-most occurrence of the species. An uncommon species in southern Victoria it is normally restricted to Alpine regions. Being located within a public reserve, the trees are not threatened, however slashing around the fringe may limit regeneration.

1997 Land sold by Mornington Shire Council

Measurements: 24/06/1992

Spread (m): 9.6
