Statement of Significance

Last updated on - June 11, 2004

Tree which occurs in a unique location or context and so provides a contribution to the historic garden or park;

Outstanding size

Outstanding example of species

Located near nursery

An outstanding specimen and the largest known example of the species in cultivation in Victoria. The tree has formed a very large trunk and canopy. A native of southern USA, the tree is grown for its prized wood for furniture and edible nuts. It is often used as rootstock for *Juglans regia* which produces better nuts. The tree has a well-structured branch canopy and has started to branch close to the ground.

Measurements: 02/09/1989
Spread (m): 19.4
