National Trust

Statement of Significance

Last updated on - June 11, 2004

Tree which occurs in a unique location or context and so provides a contribution to the historic garden or park;

Outstanding size

Outstanding example of species

Located 30 metres West of nursery

An outstanding example of this evergreen New Zealand native tree. The dark green, glossy, large oblong leaves are particularly attractive. This tree displays its typical habit of several upright trunks and produces yellow, olive-sized seeds which are poisonous. The tree is the best known example of a tree species which was planted in many early gardens but is now uncommon. It is very hardy on coastal sites.

Measurements: 02/09/1989
Spread (m): 7.5
Girth (m): 2.15 (at ground)
Height (m): 14.6
Estimated Age (yrs): 60
Condition: Good
