Statement of Significance

Last updated on - June 11, 2004

Horticultural value
Rare or localised
Outstanding example of species

A very attractive tree with long, pointed glossy leaves. It has grown into an attractive conical form with a dense crown. The species is rare in cultivation and is not available in the nursery trade. A native of the Himalayas, other known specimens occur at the Royal Botanic Gardens (x8).

It is located beside the drive approximately halfway between the entrance and the house
