Statement of Significance

Last updated on - September 28, 2005

Contribution to historic garden
Rare and localised
Outstanding example of species

A very large spreading tree which is a major feature of the Hopetoun Lawn in the Royal Botanic Gardens. It is the largest and finest example of the species known and is thought to be a remnant of the 'pinetum' established by Mueller in the 1860s. Surprisingly, this species is rarely cultivated in Victoria. It has a lean to the north - west but is otherwise in good condition.

Measurements: 04/07/1990
Spread (m): 25.8
Height (m):

Girth 9m): 4.23

Measurements: 06/2003

Spread (m): E-W 26; N-S 23

Girth (m): 5.12

Height (m): 14

Estimated Age (yrs): 143

Condition: Good

Access: Unrestricted

Classified: 12/07/1990
