## Statement of Significance

Last updated on - June 30, 2004

Contribution to the historic garden  
Rare or localised  
Outstanding size

A species rare in cultivation in Victoria. This specimen is by far the largest known in cultivation. Other specimens occur in Eastern Park, Geelong and the Geelong Botanic Gardens. The tree appears to be under stress due to soil conditions, possums and age.

July 2010: Reported removed due to unstable root system.

Measurements: 09/1986

Spread (m): 16.2  
Girth (m): 3.42  
Height (m): 16.8  
Estimated Age (yrs): 90  
Condition: Fair

Access: Unrestricted  
Classified: 11/09/1986
