National Trust

Statement of Significance

Last updated on - May 1, 2007

Contribution to historic garden
Rare or localised

A native of northern NSW and Queensland, this tree is the only known example of the species in cultivation in Victoria. The species is noted for its green leaves and red berries. Unfortunately this tree exhibits some terminal dieback, extensive deadwood and a bifurcated trunk at about 3.5 metres. Urgent work needs to be undertaken to ensure its survival.

April 2007 the tree was removed

Measurements: 08/1993

Spread (m): 11.7
