Statement of Significance

Last updated on - June 16, 2008

Particularly old
Outstanding size

This tree is notable for its large trunk circumference and unusual growth form. It is amongst the largest known examples of the species in Victoria, and is exceeded only by the specimen at Willsmere Hospital which is in poor condition. The tree has been previously pollarded but has regrown into a large attractive specimen. There is a crown cavity and the surrounding soil is compacted but the tree has good vigour. This species is a common street tree planting in Nathalia and this is by far the best example. Botanist, Dr J Willis recalls the tree being almost the same size as it is now (1992)

Measurements: 29/02/1992
Spread (m): 16.3
Girth (m): 6.99
Height (m): 16.7
Estimated Age (yrs): 120
Condition: Good

Access: Unrestricted
Classified: 12/03/1992

Other Names Pepper Tree,
Hermes Number 71486
Property Number
