National Trust

Statement of Significance

Last updated on - June 18, 2008

Trees which occur in a unique location or context and so provides a contribution to the historic garden or park;
Particularly Old

Fine example of the species

Both trees are outstanding examples of the Carob and are of considerable size. The specimen located at the back of the homestead is in good condition. The specimen in the garden next to the homestead has several basal cavities and branch decay due to poor pruning in the past. Both trees require surgery to ensure their long-term survival.

Ballam Park was built in 1855 by Frederick Evelyn Liardet.

Measurements: 09/1984
