History

Heritage Inventory History of Site: The Mining Surveyor's Report of September 1860 stated that a patch of auriferous quartz was discovered in the gully. In November 1860 there were about 50 men working at this site. In February it was reported that a site for a horse powered puddling machine had been taken up with an acre of ground that had been previously worked by tub and cradle. In April 1861 it was reported that a puddling machine had been set to work in Charcoal - burner's Gully.

This place/object may be included in the Victorian Heritage Register pursuant to the Heritage Act 2017. Check the Victorian Heritage Database, selecting 'Heritage Victoria' as the place source.
