## Statement of Significance

Last updated on -

SiteCard data copied on 04/07/2024:

## What is significant?

The surviving in situ foundations have some potential for the recovery of more information through archaeological techniques.

## How is it significant?

The site has significance due to its condition and archaeological potential

# Why is it significant?

Site is local significant as a major Bendigo mine.

Interpretation of Site	Poorly preserved quartz mine that has some in situ machinery foundations. There is also a dump of bulldozed foundations that cover the shaft. The crown land reserve on which the site is located has been developed as a nature reserve.
Hermes Number	8442
Property Number

## History

Great Extended Hustlers. This company, the greatest on the Hustler's line, was formed in 1865, and at that time it included all claims on Hustler's Hill, except Latham & Watsons. During 1870 this mine yielded 18,209 oz. of gold from 13,998 tons crushed and paid £63,700 in dividends before June of 1871. By 1880 this company had obtained 144,719 oz. of gold and paid £363,000 in dividends. Payable reefs were later found at 1860 feet (in 1887), and at 2,840 feet (in 1898) after sinking through hundreds of feet of unproductive country.
