Historical
Significance

The historical significance is assessed as medium.

Interpretation of
Site

The oldest site foundations are the dressed bluestone slab of the cobbled driveway. Each concrete slab floor appears to be younger than the next, giving a progression of structures from the bluestone slab (possible 1840s) through to the most recent concrete slab (probably 1950s). The site most probably represents a series of domestic living arrangements and associated infrastructure.

Archaeological
Significance

The archaeological significance of this site is medium for its potential to show material evidence from a continuous occupation of the site. This information could only come from archaeological excavation and analysis of the recovered material remains.
