Location

Wreck Beach, Moonlight Head

Victorian Heritage Register (VHR) Number

S259

Date lost

06/09/1891

Official number

74478

Construction material

Iron

Hull

Moulded depth 25', classified 100 A1, 2 decks, raised quarterdeck 12',
 forecastle 31.5', built under special survey, cemented 1875, two
 bulkheads. In 1875 the vessel's dimensions were 235.1 x 36.6 x 23.0

Propulsion

Sail

Number of masts

3

Length/Breadth/Depth

229.40 Feet / 36.30 Feet / 23.00 Feet

Builder

Harland and Wolfe

Year of construction

1875

Built port

Belfast

Built country

Ireland

Date lost

06/09/1891

Departure

Hamburg

Destination

Melbourne

Cargo

Spirits, toys, dynamite and other general cargo. Pianos, Cigar boxes, pig iron, dynamite, bitters, spirits, matches, furniture, glass, paper, chemicals, steel and iron wire, hardware, sewing machine, nails, bottles, jute, colour, toys, mouldings, china, woodware, pencils, dolls, cement, starch, candles, glucose, oil, grease, lampware, brassware, artist supplies, porcelain, brushware, tinware coke.

Owner

W.J. Mayers, Son & Co.

Master

Capt. Vickers

Weather conditions

Squally, thick

Cause of loss

The Fiji left Hamburg on 22nd May. The vessel went ashore at 3.00am on the morning of the disaster after squally and boisterous weather soon after sighting Cape Otway. The wind had suddenly veered, and the vessel missed stays after attempting to wear ship and was driven onto the rocks. Attempts were made to launch the boats but they were swamped and dashed to pieces. Delays in getting the lifeboat and the apparatus to the scene resulted in 12 of the 25 crew drowning after 10 hours trapped on board.

Statement of significance

The Fiji is archaeologically significant as the wreck of a typical 19th century international sailing ship with cargo. It is educationally and recreationally significant as one of Victoria's most spectacular historic shipwreck dive sites with structural features and remains of the cargo evident.

VHR history

The barque Fiji left Hamburg on 22nd of May 1891. The vessel went ashore at 3 am on the morning of the disaster in squally and boisterous weather soon after sighting Cape Otway. The wind had suddenly veered, and the vessel missed stays after attempting to wear ship and was driven onto the rocks. Attempts were made to launch the boats but they were swamped and dashed to pieces. Delays in getting the lifeboat and rocket apparatus to the scene resulted in 12 of the 25 crew drowning after 10 hours trapped on board. A local resident, Arthur Wilkinson, lost his life trying to save one of the crew who was struggling in the surf. Coffins were made out of the wreck timbers and the men buried on the cliff top above the wreck. The deaths precipitated critical comment in the press over the lack of prompt action. Other news items appeared claiming drunk and disorderly behaviour by plunderers amongst the corpses and wreckage on the beach. The controversy reached parliament.
